OBJECTIVE

I'm a senior blockchain developer with more than 5 years of experience, so you can describe me as a qualified analyst in banking & finance. I also worked on the development and on improvement and architecture design of a wide range of complex financial IT systems. Several years ago I've discovered blockchain and got very excited about this new technology that was innovative and ambitious. Due to the very high-speed improvement of the blockchain sphere, I'm constantly learning and trying out new technologies and solutions. Also, based on my experience I can provide you with a consultation on your project, suggest the most suitable variants and design the full architecture from scratch or using your materials as a base.

WORK EXPERIENCE

Senior Blockchain Developer (Full-time, Remote) — Crypto Kitties

May 2019 - Jun 2021

CryptoKitties is a game centered around breedable, collectible, and oh-so-adorable creatures we call CryptoKitties! Each cat is one-of-a-kind and 100% owned by you; it cannot be replicated, taken away, or destroyed.

Achievements

- Developed Pools and Synth for ERC20 protocol smart contracts using Solidity on Hardhat.
- Make testcase using Jest for smart contracts developed myself and others.
- As a problem solver, I solved plenty of issues on security side and gas optimization on contract relationship and code quality.

Technologies & Tools used:

`React` `Smart Contracts` `Solidity` `Web3.js` `Hardhat` `ERC20` `Github` `Trello` `Figma`

Smart Contract Developer (Full-time, Remote) — World Of Women

Oct 2016 - Nov 2018

World of Women is about growing the nft art space that's already here and that we love. We see thousands of artists committed to the space and we will do our part to lift the market up. Building a collection through the acquisition of 1/1 Crypto art pieces. Taking in consideration the recommendations of all WoW NFTs owners

Achievements:

- Implemented perfect UI following designs
- Developed pools and ERC20 protocal smart contract
- Unit test

Technologies & Tools used:

`Smart Contracts` `Solidity` `Web3.js` `React` `Gitlab`

Frontend Developer (Full-time, Remote) — Business Friend

Sep 2014 - Aug 2016

Business Friend is redefining how you connect with your professional and social network. This site is a social networking and communications utility that helps you say connection with the people and professionals that matter the most.

Achievements:

- Implemented perfect UI following designs
- Implemented social network features related to posts
- Improved socket communication
- Make best practice and common components
- Review teammate's code

Technologies & Tools used:

`Angular` `Firebase` `Socket.io` `Node.js` `Gitlab` `Jira`

SKILLS & TOOLS

Blockchain

Solidity

Web3.js

Ethereum

React

C++

Backend

Python/Django

Ruby/Rails

PHP

Golang

Others

`DevOps` `Code Review` `Git` `Unit Testing` `Wireframing` `Sketch` `Balsamiq` `WordPress` `Shopify`

EDUCATION

BSc Computer Science
Singapore Institute of Technology
2011 - 2014

LANGUAGE

English (Fluent)

INTERESTS

Climbing
Snowboarding
Cooking
